

## HOW TO SUPPORT LARGER BILLS WITH PULSE VALIDATORS

**Symptom:** Trouble accepting bills. 24vac or 115vac pulse validator won't accept bills larger than \$1 even if the switch settings are set correctly for larger bills. This statement only applies to Pulse validators as MDB will handle multiple bill denominations through the same signal wire to the controller. Pulse validators have a unique/discrete wire for each bill denomination.

**Solution:** Use inOne Technology pulse validator cable, part# 11-0196-21 which has signal wires for bills larger than \$1. Now your validator should take 5's, 10's and 20's also
